

UKG Dimensions Information Access

New Home Experience

The New Home Experience provides a unique, recognizable, and accessible look and feel across all UKG solution features, offering new tile layouts, colors, and many other stylistic elements.

Important: The New Home Experience is turned off by default. Administrators must turn on the New Home Experience in Administration. We encourage you to turn on this feature to get familiar with the new functionality. Starting with the R9 release this feature will be the only experience available and it will show ON as default.

After logging in, all users see a new menu configuration on the Home page, even if the New Home Experience is turned off.

Enable Enhanced Home Page

The Home Page has been enhanced with many stylistic changes including fonts, colors, and tiles. Because the new look is turned off by default, administrators must enable this functionality.

Navigation: Main Menu > Administration > Application Setup > System Configuration > System Settings

1. From the **System Settings** page, select the **Global Values** tab.
2. Search (Ctrl+F) to locate the **New Home Experience** section.
3. Opposite **global.new.home.experience.enabled**, select the **True** radio button.
4. Select **Save**.
